Steve ,

I like the idea of converting the archives to HTML - it will make it easier for appliance operators (we need a new name for this) like myself to cruise WWW (maybe transport operators, VW operators, friends of BOB, etc)

Thanks for your work - it would really be nice if we can get a nice QRP Homepage with lots of files etc to access at will (reviews, FAQ's, technical tips etc)

Subject: HW8 Supply

Wow, didn't know that I had a priceless item.
It's not for sale and it's on loan with the
OHR Explorer. Sorry.

About the price list. Some people just got on
board, so let me repeat what I'm doing. I'm
accumulating a list of the original price of
QRP related items and some that are not just QRP.

Reason: for my own use at Dayton and thought that
I would share it with others. It's not a "police
price" issue, just want to make sure that I know
what it originally cost and if I want to pay the
asking price. We've all been there and we've all
done that.

There is so much interest in this that I will post
to the group. Shouldn't be all that long anyway.
Several years ago I posted the TenTec price list
and will use it also.

40M last night was hot, though some QRN. F3 (France)
heard at 0300UTC around 7.030MHz and he was 559.
He didn't hear me though, but hey, you can't work 'em
all.

In the CST time zone we are 5 hours from UTC, since
we jumped forward an hour. I'll have to go back to
the post to see if I was asleep at the wheel. :-)

Subject: Re: MIZUHO HTs in Ramsey Catalog

From owner-qrp-1@netcom.com Tue Apr 4 15:43:46 1995
From: dgf@netcom.com (David Feldman)
To: qrp-1@netcom.com
Subject: MIZUHO HTs in Ramsey flyer

I received a copy of a Ramsey "spring deals" flyer. They are offering Mizuho HF SSB/CW HTs in various bands. No detail on accessories. Their phone on the flyer is 800 446 2295.
73 Dave WB0GAZ dgf@netcom.com

I called Ramsey, but they can't answer questions on the 800 number, only take orders. So I called the technical info number 716-924-4560. They are closing out these units, and won't carry them in the future. The list price is \$349, and they are closing out for \$249. They don't have the accessory antennas for all bands (I got the last one for 20M). They have 20M, 17M, 15M, and 10M HTs left. Dual-subband, CW and SSB, tunable. Nicad batteries are included in the purchase price. The units will also use regular batteries (they use one more battery if using Nicads, adapter to fill the slot when using regular batteries).

I have not verified this information, so take it for what it's worth. If you're interested, you need to verify all information for yourself. I am not associated with Ramsey in any way.

My call to them was a few hours ago.

Subject: OHR 30M Review

Here is my review of the Oak Hills Explorer for 30M.

Internet QRP-L Rig Report Form
(Format modeled from CQC Lowdown Newsletter)

MFR: Oak Hills Research
Address of MFR: 20879 Madison Street, Big Rapids, MI 49307
(616) 796-0920
Designer: Dick Witzke, KE8KL
Model: OHR Explorer 30M
Size: 6.5"x6.5"x2.75" and height measured from table to
top of rig with feet height included.
Weight: about 32 oz. (see below)
PC board: Double Sided, Plated through holes, Silk screened and
Solder masked. One board internally mounted on 4 standoffs.
Manual: About 32 pages, including schematics, parts photos, etc.
Excellent step by step instructions, well written.
Power : 11-13VDC (measurements below at 12.4VDC)
RX Drain: 50mA
TX Drain: ~400mA at 2.5W out
Modes: CW only

Kit?: Yes. Complete with case, knobs, etc.
Bands: Available 80M,40M,30M, and 20M
LO/VFO: VFO from 3.600-3.650MHz on 30M version
Drift: <100Hz from cold start
Dial Range: 10.100 to 10.150MHz marked 0-50 in 180 degrees
7:1 ratio on variable cap
RX: Superhet with IF at 9.5MHz
XMT: Yes. 0.0-2.5W output internally adjustable
Filter: Four crystal filter at 9.500MHz
Selectvty: about 500Hz
RIT: Yes about 2KHz either way
Gain: AF gain only.
AGC: Yes.
Preamp: No
Atten: No
SPKR: No. Phone jack (1/4") on front panel.
Meter: No.
S Tone: Yes. Level adjustable internally.
VFO: Yes. Covers 50KHz of 30M band.
Output: 0.0-2.5W adjustable internally
Internal Keyer: No
QSK: Yes. Solid state switching, nice and clean.
Price: \$119.95 US and \$5 S&H (call)
Availability: Yes.
Options: None.
Date of Review: April 6, 1995
Author: Chuck Adams, K5FO
Comments: Another Super rig from OHR. I have 3 of these.
Good selectivity and sensitivity on 30M. Will
compare with MXM 30M receiver soon.

I am guessing on exact weight. Weighed in at 231 lbs and jumped 1.5 pounds (resolution 0.5lb on scale, so rounded up). :-). Also called Dick and he said 32oz. :-)

Message-Id: <9504061431041557@usfamily.wa.com>

Hi Gang this is Roy W6EMT
As many of you probably know already, Bob Farnworth WU7F came up with the idea for the QRP afield idea, and the Norcal QRPp club sponsored the event. Bob is not yet on the Internet, but close. Some one asked what a

summary sheet was. I think what Bob has in mind is the following. If any of you have some pictures of the event in your area, please send them along a short blurb to Dave Ingram K4TWJ at CQ magazine. Dave will be doing something on the event in CQ magazine. Here is Bob's summary enjoy it please.....

QRP TO THE FIELD - W6EMT/QRP
MARYMOOR PARK REDMOND, WASHINGTON.

A COUPLE OF HOURS BEFORE THE START OF THE CONTEST, ROY W6EMT AND I GOT TOGETHER FOR BREAKFAST. IT WAS RAINING HARD AT THE TIME AND WE WONDERED HOW DRY OUR PRIME FIELD LOCATION WAS GOING TO BE. WE STRETCHED OUT BREAKFAST WHILE THE RAIN CONTINUED TO FALL. WE LEFT THE RESTURANT AND HEADED TO THE COUNTY PARK WHERE ROY HAD LOCATED A PLACE TO SET UP THE STATION. A LIGHT RAIN WAS FALLING BY THIS TIME, THE WEATHER WAS LOOKING BETTER.

THE CONTEST HAD ALREADY BEGUN WHEN WE STARTED SETTING UP. FIRST A TARP WAS SETUP, NOW WE COULD KEEP DRY. NEXT WE HAD TO CONCENTRATE ON GETTING AN ANTENNA UP. OUT CAME THE "NFOR" * VERTICAL, BOY, DOES THAT ANTENNA GO UP FAST. IT CONSISTS OF SIX PIECES OF ALUMINUM TUBING THAT ARE EACH SIX FEET LONG AND TELESCOPE TOGETHER. TO COME UP TO A 33'6" VERTICAL. RADIALS WERE ADDED AND THE WHOLE FED WITH 450 OHM LADDER LINE. A "Z"-MATCH TUNER ON THE TRANSMITTER END AND W6EMT/QRP WAS ON THE AIR WITH ROY'S HOME BREW 20 CW METER RIG. THE FIRST CONTACT WAS AA5BZ, TX, AT 1652Z.

NEXT A TWENTY YEAR OLD "KIRK" TWO ELEMENT BEAM WAS MOUNTED ON TWO STICKS OF TV MAST WITH GUYS AND A TRIPOD BASE. FINALLY, THE STATION WAS TOTALLY TOGETHER AND FUNCTIONING, AND THE CONTEST WAS ONLY TWO HOURS OLD.

THE STATION LOCATION IN THE PARK WAS NEXT TO A GROUP OF SOCCER FIELDS, THAT PROBABLY WON'T BE USED DURING THE WEEKEND. SURE, YOU BET IT WON'T BE USED, I HAVEN'T SEEN SO MANY SOCCER PEOPLE BEFORE, AND ALMOST EVERYONE OF THEM THOUGHT WE WERE EITHER THE SIGN-UP AREA OR SPYS. IT TOOK ONE OF US FULL TIME TO EXPLAIN WHY WE COULDN'T SIGN THEM UP AND WHAT WE WERE DOING. I SURE WISHED THAT WE HAD SOME HANDOUT MATERIALS ON HAM RADIO, WHAT AN OPPORTUNITY.

THE CONTACTS DURING THE CONTEST WERE ALL OVER THE U.S. WITH KP4DDB BEING THE FURTHEREST, AND KE7NX OR. AND NJ7M IN ID BEING THE CLOSEST. WIERD PROPAGATION, LIKE A ROLLER COASTER, WITH VERY FEW CONTACTS TO CALIF AND NO LOCAL CONTRACTS. ROY AND I FINISHED UP WITH A TOTAL OF 35 CONTACTS ON 17M SSB, 20M CW AND SSB, AND 40M CW. OUR POINT TOTAL CAME OUT TO 705 POINTS AND WE ACCOMPLISHED THE MAIN REASON FOR GOING TO THE FIELD, WE HAD A BALL. ROY HAS DEVELOPED A GREAT LITTLE TRANSCEIVER, WITH AN HONEST 5 WATTS OUT. MAYBE NEXT YEAR WE SHOULD START AND FINISH A LITTLE LATER IN THE SEASON ? NOW FOR "FIELD DAY" IN JUNE AND "QRP AFIELD" IN

SEPTEMBER. WHO IS GOING TO PUT TOGETHER A "WINTER QRP IN THE FIELD"?
FOUR FIELD CONTESTS A YEAR WOULD BE GREAT, JUST LIKTR THE VHFERS. BOB
WU7F.....

Subject: Re: QRP ARCI Info

Ron,

Good luck on the new job. To me, you're are taking on one of the most
important jobs for ARCI - getting out a quality newsletter. The QRP
Quarterly is what makes ARCI what it is - that and all the volunteer work by
the members. Please let me (and I suspect many of the qrp-l list) know
what I can do to help make your job a little easier. I'm about to drop a
note to the ARCI BOD with some of my ideas on the future of the ARCI and the
most important component (to me) of ARCI's success is a quality newsletter -
it is the ONLY bond (besides QRP itself) that makes ARCI succeed.

72 Ron and I hope to thank Paula for the great work she has done in the past
if she is at Dayton.

Subject: QRP Handouts for Dayton Booth
Message-Id: <Pine.SUN.3.91.950406063747.3620A-100000@mango.epix.net>

Hi Charles:

Originally I contacted CQ magazine about permission to photocopy my two part article (March & May) on QRP to be used as a handout at Dayton. I have just been notified that Part-II is not going to appear in the May issue but has been moved back to the June issue (hope it makes it in before Xmas!). However, they have given permission to photocopy the first part provided "Reprinted with permission of CQ Magazine" is included on the first page.

If the club wants to use this for a free-bee handout at Dayton, you have the necessary permission from CQ and myself. Just thought it would be nice to have a handout available for those people coming by that showed some interest but were not ready to join at that particular time.

Subject: QRP Power

In reading over a recent message on the ARCI-QRP, it said that SSB QRP is considered 10w PEP. Using the OakHills Research WM-1 wattmeter, or similar, does this mean the needle can go as high as 10 watts and I'm still considered QRP? (Sorta new to QRP, so I apologize for my ignorance.) (10 watts on ssb).

tnx

Date: Thu, 6 Apr 1995 07:25:23 -0400 (EDT)

For those having trouble getting into SunSITE.unc.edu due to heavy loading "busy now", do one of these:

For those with WWW access, the URL is:

<http://sunsite.sut.ac.jp/arch/Academic-Info/agriculture/agronomy>

Or for GOPHERing:

gopher SunSITE.sut.ac.jp
Choose 'Academic-Info', then 'agriculture', then 'agronomy'

Or for FTPing:

ftp SunSITE.sut.ac.jp
cd /pub/academic-info/agriculture/agronomy

Any of the above lands you at the place where DAILY.* and 3DAY.* files are kept.

To access the main ham radio archives, move into the 'ham' subdirectory.

These are mirrored sites, so they might be as much as 24 hours behind

SunSITE/unc, depending on their scheme for mirroring transmissions.

The Japan machine appears to be quite fast. I will be browsing several other of the worldwide network of SunSITES to see which others mirror SunSITE/unc. More info later.

>From: brian.carling@acenet.com

KD>Has anyone heard from Myron Koyle, N8DHT yet concerning our room reservation
KD>at the Days Inn, Dayton South? I have talked to his wife a couple of times

This message really RESONATES with me! It even PEAKED my sister L.C.'s (Elsie's) interest too. Lowell, I.F. you are able to WIND UP being able to INDUCE Mr. Koyle to share a room with you for some MUTUALLY INDUCTIVE reasoning about QRP while you are up at Dayton, you can better GAUGE what the trends are in QRP. I.F. you only have one rig in the room, you will have to take TURNS at it, but I am certain this will TRANSFORM your view of amateur radio to the CORE of your being!

TANK you very much and 72 de AF4K

p.s. What shall we NAME Lowell? "King Koil?" I guess only if he is tuning up a bed spring antenna! Sorry Lowell, couldn't resist.
ETCHOO!
